DINGU SAGAR V K

📞 +1 (404) 200-3160 | 📧 dingusagar@gmail.com | 🌐 github.com/dingusagar | 🌐 linkedin.com/in/dingu-sagar

AI Software Engineer with 4.5 + years of experience designing, building, fine-tuning, optimizing, and deploying deep learning solutions including Multi-Modal LLMs, distributed systems for SaaS. Demonstrates a product- and customer-centric mindset with strong ownership and rapid learning skills leveraging modern AI tools.

EDUCATION

Georgia Institute of Technology — **Atlanta, USA**
Masters in Computer Science, Machine Learning Specialization — *Jan 2024 - Dec 2025*

- Current **GPA 4.0 / 4.0** | Graduate Research Assistant

Indian Institute of Information Technology (IIIT) — **Kancheepuram, India**
Bachelors + Masters in Computer Engineering (Dual Degree) — *July 2015 - July 2020*

- Graduated with Distinction; CGPA 9.22 / 10

SKILLS

- **Programming:** Python, Java, C++, C, JavaScript, TypeScript, Kotlin
- **ML & AI:** Generative AI, Transformers, XgBoost, LightGBM, LLMs (Llama, Qwen, GPT, Gemini), Large Vision Models, Multi-Modal VLMs (CLIP), LangChain, PyTorch, TensorFlow, Kubeflow, MLOps, scikit-learn, Pandas, Retrieval Augmented Generation (RAG), Data Mining, Distributed Training, ML Infrastructure, LLMOps, NLP, Reinforcement learning, Statistical Data Analysis, Search, MLFlow, Data Visualization (Plotly, Tableau, Streamlit)
- **Backend & Cloud:** Spark, GCP, FastAPI, Flask, Spring, Azure, AWS, Vertex AI, SageMaker, MySQL, MongoDB, Redis, Kafka, Vector DB, ElasticSearch, MapReduce, Kubernetes, Flink

RELEVANT EXPERIENCE

Software Engineer Intern | Amazon, Seattle — May 2025 - Aug 2025

- Designed, built, and deployed an end-to-end **ML powered anomaly detection data processing** pipeline for inventory cost data, **processing ~20 million daily records** in a distributed spark cluster, **impact of ~$12M** in one quarter; used PySpark, RCF model, AWS CloudFormation, Glue, Step Functions, Lambda

Machine Learning Engineer | Arintra, Bangalore, India — Apr 2023 - June 2024

- Built and integrated the platform's first set of DL features, improving automated medical coding **business metrics (D2B) by 16%**, showcased in investor demos.
- Migrated legacy rule-based NLP services to DL & **LLM** based text extractors for clinical entities and relations, **improving coding accuracy from 70% to 94%.** Utilized **LLMs** like Llama-3, GPT-4, MedLM, RAG, Medical Knowledge Graphs and custom modules to handle hallucinations and improve reliability.

Machine Learning Engineer | Drishti, Bangalore, India — Oct 2022 - Jan 2023

- Distributed training, debugging, evaluation and deployment of **3D CNN models** (I3D, BMN) for action recognition in videos, delivering 93–97% precision & recall across customer use cases and user feedback.
- Conducted research experiments with GLIP model using PyTorch, improving training efficiency with minimal train set.

Senior Machine Learning Engineer | Engati (formerly part of Coviam Technologies) — Aug 2020 - Sep 2022

- **Led a team of 4** to build an e-commerce product recommendation system, **designed a novel** search retrieval & ranking (using BERT embeddings, VectorDB, CLIP), **scaled to 1M+ product listings** in production with 93% recall.
- **Optimized inference latency by 40%** for models developed by ML Scientists using ONNX, quantization, knowledge distillation, AWS Neuron.
- Designed, built & deployed AI chatbot assistants for Shopify clients, **resolving 60% to 70% of customer queries,** and built MLOps pipeline using Kubeflow, TF Serving for automatic retraining. Recognized with "Braine Award"

Software Engineer Intern | Coviam Technologies, Bangalore, India May 2019 - Oct 2019

- Build backend APIs for HR Management Software. Designed and built a microservice for pinning items across HR use cases.
- Optimized caching layer - used hibernate interceptors to do cache flushes on database updates that solved stale data issues.
